

Digital Field Recorder

Palm Held Professional Digital Recorder

AEQ PAW-120

- Digital Recorder at a cellular phone size.
- Built in speaker.
- High quality microphone cells and optional external stereo microphones.
- Support of MPEG 1 Layer II and Linear Wave formats.
- On board 1GB flash memory.
- Sound Waveform editing software.
- USB removable disk compatible with Windows and Mac-OS.
- 2 x AA batteries.

The recording-editing system AEQ PAW-120 is a professional digital recorder designed for fieldwork. It records with exceptional quality and is ideal for journalism and broadcast applications. Its portability allows the user to operate it with a single hand and view the information on its large dual color screen.

The PAW 120 allows the user to record, playback and cut, the MUSICAM, BWF, and WAVE formats. The recorder also can connect to a PC via USB interface to upload or download audio files.

AUDIO EDITOR

The PAW-120 includes a user-friendly, non destructive audio editor. Its brighter OLED display makes sound editing a more comfortable job for the journalist. It allows sections of unwanted audio to be removed. Possibility of Zoom-in.

MEMORY

1GB memory can hold roughly 18 hours of voice recording at 128kbps of MPEG 1 Layer II in mono which is in FM quality, and can hold about 10 hours of music recording at 256kbps of MPEG 1 Layer II in stereo in FM quality.

AUDIO

PAW-120 allows the following compression format:

- Linear PCM
- MPEG 1 Layer II
- CCITT a-Law
- CCITT u-Law
- G729a

FILE TRANSFER

The USB port serves two purposes: File download or external DC powering. Direct audio files download from PAW-120 to Windows and Mac-OS
